

MASTER YOUR
GEOSPATIAL DATA
AND PUT IT TO
WORK FOR YOU.

md**MAPMASTER**
direct georeferencing

The microdrones mapmaster solution builds on the mapper package, by using direct georeferencing to provide:

- survey grade accuracy: 1-3 pixels x and y, 2-4 pixels in z
- efficient flight profiles: minimize sidelap and achieve survey grade results without setting up GCPs
- reduction or elimination of Ground Control Points (GCPs)

The mdMapMaster package includes:

md4-1000			mdWaypoint
mdRC			Charger & Flight Battery
Digital Data Link			mdCockpit
Sony RX1R II with mount			mdAcademy Operator Training
mdDG (APX-15 UAV)			Rugged Carrying Case
POSPAC UAV		Options
