C-TARGET 9 AUTONOMOUS SURFACE VEHICLE (ASV)

Marine Target

C-Targets are a range of lightweight, easily deployed, highly maneuverable marine targets used for naval gunnery training, weapons testing and ship command and control assessments. The C-Target 9 is a high-speed vehicle capable of acting as a direct-fire target or as a tow boat for inflatable targets or other small craft. The vehicle can be customized to resemble specific craft and is configurable between manned and unmanned modes.

KEY FEATURES

- > Highly survivable and repairable aluminum hull
- > Wide range of optional visual, radar and thermal enhancements
- > Optional console and seating module for conventional manned use and MCA coding
- > Remote operation through direct control or programmable console
- > Can operate individually or as part of a swarm
- > Operated using ASView-T, an autonomous surface vehicle control system for C-Targets
- > Can be customized to resemble specific craft and configured as a low-cost ASV with the addition of upgraded cameras and control functionality

APPLICATIONS

- > Naval gunnery training
- > Weapons and platform trials
- > Ship command and control and pre-deployment assessments
- > Surface-to-surface and air-to-surface applications
