**UNMANNED
SYSTEMS SOURCE**

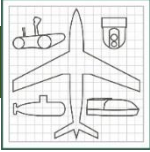

Unmanned Systems Source is an online, e-commerce warehouse with the fastest growing selection of unmanned systems and remote sensing products available today. This one-stop-shop allows consumers to research, configure and purchase a complete system or simply shop individual components and equipment...all with the click of a mouse.

Unmanned Systems Source is built on more than 25 years of industry experience which provides direct benefits to visitors, including: extensive product descriptions, technical data and drawings, detailed specifications, comparison tools, educational resources, and exceptional customer support. An internal team of technical and configuration specialists are also available to answer questions.

Consumers also find competitive pricing by shopping from a company that buys in bulk, enjoy convenient shipping and can choose from several secure payment options.

Users can customize a vehicle from start to finish, choosing platforms and subsystems that work for them. They can also shop pre-packaged solutions, subsystems and parts. Current categories include:

- **VEHICLES** – Air | Ground | Sea
- **PROPULSION** – Heavy Fuel Engines | Electric Motors | Rockets
- **AUTONOMOUS CONTROL** – Auto Pilots | Avionics
- **RF COMMUNICATIONS** – Data Links | Radios | Amplifiers | Transponders
- **ENERGY STORAGE** – Batteries
- **POWER MANAGEMENT** – Generator Boards | Motor Speed Controllers | Custom Solutions
- **SENSORS & PAYLOADS** – Multi-Spectral | Direct Mapping | Laser Altimeters | EO/IR | Optics
- **GROUND EQUIPMENT** – Mobile Command Centers | Launchers | Rack Mounts | Computers | Software
- **ANTENNAS** – Omni | Directional | Yagi
- **ACCESSORIES** – Connectors | Adaptors | Cabling | Cases

Unmanned Systems Source is committed to providing users the best possible customer service to ensure absolute mission success from start to finish. Additional services include:

ENGINEERING SERVICES – Our team of engineers has the expertise to solve any challenge – from design and development through implementation. Services include:

- Cutting-Edge Design
- Platform Selection
- Technology Integration
- System Configuration
- Operational Support

CUSTOMIZATION SERVICES – Certain challenges require custom solutions. Our team can solve the toughest challenges at any point along the journey – from system design to mission support and flight training.

OPERATIONAL SERVICES – Get moving quickly, we can help. Our team can assist with mission planning as well as training and certification on a variety of unmanned platforms to ensure complete mission success.

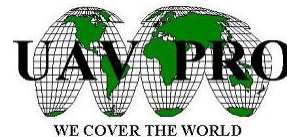

Unmanned Systems Source continues to increase product offerings by entering distribution partnerships with quality manufacturers that serve the industry. Distribution partners with Unmanned Systems Source enjoy many benefits, including:

- Non-exclusive distribution relationship with USS
- Exposure of products to a larger audience base
- Control over which products, parts or systems are made available for sale
- Inclusion in USS marketing materials and promotions
- No out-of-pocket fees or costs to include products

Partnerships with quality manufacturers and suppliers is a natural outgrowth of Unmanned System Source's long-standing relationships within the unmanned industry. We continue to expand our partnerships to ensure future growth and customer satisfaction.
