

EchoBoat-160™

Unmanned Surface Vessel for Hydrographic Survey Applications

The **EchoBoat-160 USV** is a purpose-built remote survey platform for hydrographic data collection. With true one-button startup, the nimble vessel accomplishes the same results demanded of large, crewed boats more efficiently and at a fraction of the cost. Like its renowned predecessors, the fifth generation EchoBoat-160 integrates professional-grade sensor suites in a compact package to navigate challenging bodies of water by remote control or autonomous wayfinding. Perform hydrographic surveys remotely, safely, and confidently with this meticulously engineered unmanned surface vessel.
