

# CREO-HUB

## Personal MANET Radio

### Tactical Communication for Security Agencies and Armed Forces

At the forefront of tactical operations, where flawless connectivity is as crucial as the mission itself, CreoHub introduces an innovative wireless communication solution.

CreoHub is a combat-proven, personal radio designed for military units, law enforcement professionals, and rescue teams to share voice, data, and video across numerous devices. It is suitable for use within buildings, ships, forests, challenging subterrains, and beyond line-of-sight operations.

Harnessing the state-of-the-art capabilities of cognitive software-defined radio, Mobile Ad-Hoc Network (MANET) technology, and advanced waveforms, CreoHub's radios establish secure, self-healing, self-forming, and resilient networks capable of handling data rates of up to 100 Mbps. This ensures robust connectivity even in the most contested and challenging environments.

CreoHub's technology excels in immunity to interference, utilizing advanced software-defined radio and interference avoidance technologies. This ensures clear, continuous communication even in complex electronic warfare environments and areas with heavy electromagnetic interference.

Designed with paramount importance to operational security, CreoHub integrates low probability of interception and detection (LPID) technology, ensuring maximum performance and minimal exposure even in hostile environments.

CreoHub is specifically engineered to meet the requirements of multidomain operations and extensive networks. It seamlessly integrates with hundreds of users, providing a reliable and uninterrupted connectivity.

CreoHub offers two primary configurations: a lightweight, energy-efficient radio for diverse missions and a robust, high-power radio designed for the most demanding operations.

# Key Features and Performance

## Performance

- Supports applications with variable data rates
- Handles up to 100 Mbps data rates
- Engineered for reliability in variable operational conditions
- Excels in immunity to interference

## Applications

- Ideal for use by military, law enforcement, and emergency services
- Versatile for operations in diverse environments: urban, maritime, forested, and subterranean
- Facilitates multidomain operations with seamless data sharing

## Immunity & Security

- Utilizes advanced frequency hopping
- Employs dynamic spectrum access
- Features low probability of interception and detection (LPID)
- Incorporates AES256 encryption

## Network Scalability

- Capable of connecting hundreds of users in large-scale operations
- Supports the creation of expansive, resilient communication networks
- Ensures comprehensive network coverage for situational awareness

## Modularity and Integration

- Offers a modular architecture for easy integration
- Supports a variety of accessories
- Enables flexible and scalable network configurations

## Operational Durability

- Built for harsh environmental conditions
- Operates under severe weather conditions
- Designed for continuous operation in the field

Specifications		CREOHUB	CREOHUB Pro
			
Transmission	Power	up to 1W	up to 10W(adaptive)
	Throughput	Up to 20 Mbps(adaptive)	Up to 100 Mbps(adaptive)
	Frequency Bands	UHF, L-Band, S-Band, C-Band	
	Modulation	BPSK / QPSK / QAM16 / QAM64	
	Bandwidth	2/4/8 MHz	2/4/8/16 MHz
	Antennas configuration	SIMO (MRC Diversity)	MIMO/SIMO
	EMC	MIL-STD-461E	
COMSEC	Encryption	AES256	
	Immunity	Spectrum Monitoring, Frequency Hopping, Interference Avoidance	
Power Management	Input power	9-18VDC; up to 10W	9-18VDC; up to 50W
	Power options	Twisted Lock Battery 7Ah/8Ah	
	Autonomy	Up to 12 hours with single battery / dual battery option	
Mechanical, environmental	Weight	430gr	620gr
	Dimensions (L,W,H)	75mm, 40mm, 140mm	85mm, 50mm, 140mm
	Material and color	Grey Anodized Aluminum	Black Anodized Aluminum
	Standards	MIL-STD-810G	
	Ingress Protection	IP65	IP68 (up to 20 minutes)

## About Creomagic

Creomagic develops and manufactures innovative communication solutions that form intelligent Mobile Ad-Hoc Networks (MANET), specifically designed for mission-critical and tactical operations. Our radio technology provides users with reliable, secure, and resilient connectivity for any mission.

At the core of our solutions is CreoNet, a software-defined radio (SDR) technology developed by Creomagic that leverages world-leading capabilities, including advanced waveforms, machine learning, and networking technologies. Our solutions are engineered and fine-tuned by a highly experienced team, committed to the highest standards of innovation across our products and services.

**BEYOND SIGNALS:**  
**CRAFTING TOMORROW'S CONNECTIONS**
