

# MOBILE OPERATIONS CENTER

## VERTICAL TAKEOFF & LANDING MEETS ENDURANCE & RANGE

The Mobile Operations Center (MOC) is an efficiency-boosting, cost-cutting asset for operating unmanned aircraft on the go. Agriculture, mapping, search & rescue, energy infrastructure patrol, and emergency response are all industrial verticals the MOC can support with robust safety features and redundancies in power and communications. We offer flexible financing for new and used machines along with retrofitting your existing vehicle into a state-of-the-art rolling control station. Create value for your business and customers with an MOC powered by Censys Technologies.

## CUSTOMIZATION

### POWER OPTIONS

- AC/DC
- Solar panels
- 3 vs 6 reserve hours
- Generator wattage
- Battery charging

### UTILITY OPTIONS

- Work bench & assembly area
- Shelving & Lighting
- Storage
