

sUAS TRAINING PROGRAM

for Public Safety and Commercial Operators

Take the guesswork out of complying with numerous requirements — pilot certification, flight safety, airspace requirements, operational procedures, and data handling policies — and let us help you choose systems best suited to your needs.

MissionGO sUAS Startup Program goes beyond hands-on training by helping you establish a professional, compliant, and sustainable sUAS program that will withstand outside scrutiny. The program includes:

- Program support — we walk you through the entire process of establishing a compliant sUAS program
- Step-by-step guidance for taking the FAA Part 107 Exam (MissionGO has a 100% pass rate for all of our students)
- Textbook, software, training materials and WebEx course to help navigate the most difficult portions of the exam
- Customized MissionGO sUAS Operations Manual
- Two days of hands-on sUAS training at your site (using your equipment or ours):
 - Day one includes a full day of instruction on sUAS flight operations (to include night ops), safety procedures, and inflight emergencies for up to 6 students
 - Day two is a full day of instruction on sUAS flight operations, basic troubleshooting, and mission specific training scenarios for up to 6 students

“MissionGO was instrumental in establishing a compliant and professional sUAS program for my Agency. The expertise and training they provided helped develop a program that is a key component of maintaining public safety in our community.”

— Lt. Thomas Gamble, Harford County Sheriff's Office

All MissionGO instructors are highly trained public safety professionals with extensive sUAS operational experience.
